

# BOLO BATTERY

Philippines

## Ancillary Services and Load Shifting

### ABOUT US

**Pacific Impact Development** is a Southeast Asia-based renewable energy developer focused on utility-scale solar, wind, hydro, and battery storage. The team brings deep expertise in finance, engineering, and stakeholder engagement, with experience across the full project lifecycle, from development and permitting to construction and operations. With an active pipeline across the Philippines and the region, Pacific Impact delivers high-standard clean energy projects that support national climate goals.

### WHY BOLO BATTERY?

The Bolo Battery Project is strategically located in Central Luzon near a major substation. The project is positioned to provide critical ancillary services, support grid flexibility, and enable strategic power market opportunities. Its location near HV infrastructure makes it ideal for delivering both immediate market opportunities and long-term revenue potential.

### INVESTMENT OPPORTUNITY

This project is at the early development stage, with site exclusivity and service contract acquired and initial assessments completed. The project offers a unique opportunity to enter early in the lifecycle of a strategically located energy storage asset. With strong fundamentals and growing market, co-development and early-stage investment opportunities are being explored in anticipation of market participation through ancillary services and load shifting of WESM markets.

### PROJECT OVERVIEW

<b>CAPACITY</b>	100 MWh
<b>TECHNOLOGY</b>	BATTERY ENERGY STORAGE SYSTEM (BESS)
<b>PROJECT CAPEX</b>	US\$30 M
<b>TARGET COD</b>	Q1 2028
<b>LAND AREA</b>	5 HECTARES
<b>STATUS</b>	PERMITTING

### OUR PROGRESS

**100 MWh**

### MARKET ADVANTAGE

The Bolo Battery Project supports retail energy suppliers by stabilizing supply contracts and reducing price volatility. It also enables investor access to WESM market opportunities while enhancing grid reliability and supporting renewable integration in Central Luzon.
